

My Health is *IN YOUR HANDS*

Take care of you for me

One in four people who are living with HIV don't know it

- » Often there are no symptoms, meaning it can be unintentionally passed on to partners.
- » Knowing your HIV status is an important part of a healthy sex life and a good relationship.
- » When treated, HIV is a manageable disease. Treatment is available at no cost and can suppress the virus, preventing transmission to partners and improving overall health.

To arrange a test
call a nurse at
1-866-778-7736.
